RE: Raymark Site

Dear Paula:

Enclosed are copies of the following maps for your immediate use:

- 1) Site parcel map with lagoon and monitoring well location
- 2) Site location map (Hatboro Zoning Map)
- 3) Plan map showing location of monitoring wells  
(By Donald Boucher - September, 1984)

I will be putting together a team of people to help with the sampling protocol quality control task we briefly discussed over the telephone yesterday. I will be receiving the paperwork for this task probably today, and will forward to you a scope of work as soon as possible. Once we agree on the exact tasks to be performed, we can get our people out to your office as soon as possible. I will attempt to get some personnel who are actively involved with current laboratory procedures and chain-of-custody requirements here at GCA so we can have the most knowledgeable people perform this quality control task.

We will need the best information you can put together regarding the EPA's past and current QA/QC procedures for sample collection and handling so we can compare the file materials against the "guidance" standards.

Please don't hesitate to call if I can help in any way. I will contact you soon about the exact scope of work for this new task.

Sincerely,

Enclosures

Eric Lee Edelstein
